**CIVIC X - MOTOR MOUNT INSTALLATION MANUAL**

**TOOLS REQUIRED**
- Set of car stands
- Flat screw driver
- Phillips screw driver
- M10 box wrench
- M17 box wrench
- M19 vox wrench
- Pry bar

**MATERIALS REQUIRED**
None

1. **When lifting the car always use stands to secure the car.**
2. Remove under tray.
3. Remove the screw and the clips holding under guard.
4. Remove the bolt connecting factory mount to the frame.
5. Loosen up the bolt connecting factory mount to the transmission. Slide it out as much as possible.
6. Pull the motor mount down and remove the bolt completely. Remove the motor mount sliding it forward.
7. Prepare the Boomba Racing motor mount.
8. Slide the Boomba Racing motor mount into the frame. Make sure the side marked “UP” is facing the top. Using prybar move engine forward if necessary.
9. Pry the Boomba Racing motor mount down to insert the mounting screw.
10. Insert the mounting screw into the frame.
11. Secure the Boomba Racing motor mount to the frame and to the transmission.
12. Reinstall the under tray.
